# Human Services Therapy Pool Definitions

<b>Arthritis Class</b>	The Arthritis Class is a recreational exercise program developed by the Arthritis Foundation to help individuals with Arthritis and other related conditions. The activities and exercises are designed to encourage self care, social interaction, improve muscle strength and flexibility. Each participant works at his or her own fitness level. Modifications are given for each exercise to help individuals customize the program to fit their needs. This program is an excellent post therapy class or post surgery class as it focuses on muscle strengthening and flexibility.
<b>Self Directed Therapy</b>	Self Directed Therapy is defined as a time in which there are no scheduled programs taking place. This time is reserved for qualified individuals to complete any exercises as directed by their physician that they know how to do and can complete on their own. Individuals wishing to use the Therapy Pool during this time must complete a Self Directed Therapy Verification form and have it on file.
